

Important Reminder

NCBI BioProject Survey

Dear CCGP Investigators and Team Members,

We are still missing NCBI BioProject information for about 100 of our 250 species.

To set up BioProjects for all the CCGP species we require that PIs or project team members complete a brief survey for all of the species within their project (approx. 3-5 min/species). Please provide this information **as soon as possible**.

[Click here to complete BioProject survey](#)

If you have already provided this information, please disregard this reminder. If you are not sure if all of your species have information, please reach out to [Courtney Miller](#).

Thanks for your cooperation and involvement!
