

CCGP Whole Genome Resequencing Webinar

November 1st & 2nd, 2021

Dear CCGP Investigators and Team Members,

It has been almost a year since the CCGP last met, and it's time for an update meeting and group discussion. Meetings will be virtual, and like last year, we will offer two meetings with the same content for your convenience. You only need to attend one. As a condition of your funding, all PIs are required to attend. Additional team members and collaborators are also encouraged to participate. Please pass this on to one and all.

We will discuss several CCGP updates, particularly on data collection and analyses, and share progress and updates from our bioinformatics team.

We would also like to collate and share with the entire group updates on whole genome resequencing progress. Please complete this 5-question survey by **Friday, Oct. 15th at 5pm PDT** so that we can summarize and share these results at the meetings:

[Click here to complete survey](#)

We would also like to highlight labs who are making particularly rapid progress on their work. If you would like to share your project's progress at the meeting in the form of a 2-3 minute lightning talk, please reach out to [Courtney](#). We'd love to hear about your work and initial findings.

Please note that we will be distributing some new guidance on whole genome resequencing data and metadata very soon, so stay tuned!

Thanks for your cooperation and involvement.

- The CCGP team

Registration is required. Please register for one of the sessions below.

After registering, you will receive a confirmation email containing information about joining the meeting. Please direct any questions regarding registration to [Courtney Miller](#).

SESSION A

Monday, November 1st
10:00 am – 12:00 pm PDT

[Click here to register](#)

SESSION B

Tuesday, November 2nd
11:00 am – 1:00 pm PDT
